

Large Forklifts

HEAVY DUTY

The KAB 61-K1 is the heavy duty, mechanical suspension variant of the KAB 65K4. Therefore, it too is best suited to large forklifts that have the cabin space to accommodate a seat of this size.

Uniquely, the KAB 61-K1 is the only seat within our mechanical seating range that is user weight rated to 170kg. The mid height backrest is especially popular in applications where there is a need to regularly look rearward.

Like the KAB 65-K4, the KAB 61-K1 can eliminate up to 70% of harmful vibration and incorporates an extensive range of ergonomic adjustments and user-friendly controls. Therefore, where it is not possible to use an air suspension seat, the 61-K1 is the best mechanical option for large forklifts.

- **Suspension Type:** Mechanical 61
- **Upper Type:** K1 mid back
OR K4 high back
- **Belt Type:** C - 4 point harness (K4 only)
